DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 6/16/2006 is being considered by the examiner.

Specification

3. The specification is objected to because the specification refers to claims number 1-7, but claims 1-7 have been canceled. Correction is required. See MPEP § 608.01(b).

Abstract

4. The abstract of the disclosure is objected to because it more than 150 words. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 13-14 and 16-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 13-14 and 16-17, the preamble recite "an attraction force type linear motor", which is inconsistent with the preamble of the claim 8 (A linear motor).

Allowable Subject Matter

7. Claims 8-12 and 15 are allowed.

8. The following is an examiner's statement of reasons for allowance.

The prior art does not teach the linear motor as recited in claim 9, which includes a mover part including a non-magnetic material holder, a base upper plate and a base lower plate to which a plurality of armature modules are respectively attached in upper and lower parts thereof, and a stator part. The stator part includes a plurality of field permanent magnets opposed to an I shaped magnetic iron cores through magnetic spaces and field yokes for supporting the field permanent magnets; wherein in both the end parts of the base upper plate and the base lower plate and the I shaped magnetic iron cores, pin holes corresponding to the forms and the arranging pitches of the I shaped magnetic iron cores are formed, and pins are inserted into the pin holes to fix the I shaped magnetic iron cores between the base upper plate and the base lower

plate. This recitation, in combination with the rest of the recited elements, clearly defines over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

9. Claims 13-14 and 16-17 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
